LETTER OF RECOMMENDATION

It gives me great pleasure to highly recommend and support Mr. Muhammad Wasim Qasim. He is well known to me for the last two years since he enrolled in our postgraduate Programme at the Department of Botany, University of Agriculture Faisalabad, Pakistan. During my interactions with Mr. Wasim Qasim., I noticed that what earned him an excellent academic record was not his natural brilliance, but his great zeal and apt tenacity to understand new and intricate concepts. He uses his initiative very well while also working well with peers. He has a good thirst for knowledge and very capable of designing solution schemes for problem mediation. He is very much able to meet goals given the freedom of self-supervision and peering. I put him in the top 1% of students taught in the last 10 years. He has excellent skills and works well with peers. I found his attitude very professional. Also, he can communicate well, and he is proficient in the use of the English language. I give Mr. Muhammad Wasim Qasim my highest recommendation for doctoral research training program in your reputed institute.

If your doctoral program is seeking superior candidate with record of achievements, no doubt Mr. Wasim Qasim is suitable. I wish him the best in his life and highly recommend him for admission into your PhD program.

Associate Professor,
Department of Botany,
University of Agriculture,
Faisalabad.
