PROJECTS

Micro-Hydro Power (MHP)

[01/06/2023 – 28/11/2023]

I did my final year project under the topic of MHP at the end of completion of this project I knew what is MHP, which location is the best place for MHP and there find some ideas about large Hydropower plants...

Automatic Sensor light

[22/04/2022 – 10/10/2022]

It was my dream to know what is the mericle behind sensor light, how they operate and how sensitive they're to materials.

And finally by doing a project on this topic I knew lots of things about sensor light and it was an awesome experience.

Short Circuit Protection

[01/03/2023 – 30/05/2023]

During our 7th semester one of our teachers gave us mini projects and because of my interest in protection and maintenance I got my mini project under the title of short Circuit Protection and I learned and experience lots new things at the end of this project.

VOLUNTEERING

Collecting money for our faculty library

[Paktia University , 01/03/2023 – 30/08/2023]

There Was a big problem on the way of all engineering students and it was lack of a modern library, so one day I shared the problem with one of my classmates the problem and he said let's go and share it with our faculty director. We went and shared our ideas with him and he agreed and said we are with you and the other day we made 4 other friends to help with us and finally we collected money and bought equipment for our engineering library. And by doing it successfully we were appreciated so much because of our good works for the future generations of engineering faculty.
