TO WHOM IT MAY CONCERN

I am pleased to write a letter of recommendation for **Mr. Rahmatullah Haydari**. I have been acquainted with him for the last two years initially as instructor for one theory course in post graduate programme and finally as a Dissertation supervisor.

I am glad to state that Rahmatullah is one of those students who happens to be a pleasure to teach owing to his quick uptake and sincerity. A good and sincere student, he proved his credentials by being conscientious at his work and also about attending classes during the course of study. I must make note of the fact that he is a good listener and extremely polite.

He has an inquisitive mind and good interpretation abilities that greatly facilitate research work. An intelligent and hardworking student, Rahmatullah has a natural inclination for teaching and research which stems from his curious mind and a nature for questioning. His interest, persistent attitude and intellectual curiosity drive him to get deeply involved in his work and be as good in it as possible.

I must make note of the fact that he has an immense ability of presenting his thought and ideas with utmost clarity that he demonstrated during seminar and M. Tech dissertation defense. I am fully confident that he can handle very effectively any responsibility in academics and research.

Wishing Rahmatullah all the success in his career and life ahead.
